PROFESSIONAL SUMMARY

Senior UX Designer with 8+ years leading end-to-end product design for enterprise B2B SaaS, data-intensive platforms, and AI/ML products. Experienced navigating organizational ambiguity, cross-functional stakeholder alignment, and design at scale across data governance, AIOps, and business intelligence domains. Recipient of a Red Dot Award for product design excellence; work shipped at IBM remains in production six years after delivery.

CORE COMPETENCIES

- End-to-End Product Design
- Design Systems (0-to-1)
- UX Research
- Service Design
- Cross-Functional Leadership
- Accessibility (WCAG 2.2)

WORK EXPERIENCE

Health and Well-Being Break November 2024 - Present

Career Break

- Took an intentional year away from full-time work to prioritize long-term health after nearly a decade without extended time off, partnering with healthcare providers to establish a sustainable, long-term health management plan.
- Took on one fixed-fee consulting engagement during this period (see DecisionSigma.ai, below).

DecisionSigma.ai November 2024 - November 2025

UX Design Consultant

United States (Remote) - consulting engagement during Health and Well-Being Break

- Redesigned the forecast chart component to support both simplified and detailed model views, reducing cognitive load for non-technical stakeholders while preserving analytical depth for energy engineers.
- Led end-to-end product design across four disciplines - UX research, product strategy, UI design, and design systems - as the sole designer on a 90-hour engagement spanning five distinct product surfaces.

Hewlett Packard Enterprise March 2023 - November 2024

Product Designer to Sr. Product Designer

New York, United States

- Held design function as sole designer through the Pachyderm acquisition and subsequent team reduction, maintaining product continuity and design output across a contracting organization.
- Built a WCAG 2.2-compliant design system in four months for two cross-functional teams, delivering production-ready components and documentation before a department restructure halted release.
- Led research-driven redesign of highest-friction user flows, reducing inbound support volume and freeing engineering cycles from triage toward roadmap delivery.
- Established cross-team design and development workflow standards in Jira, reducing design-to-engineering handoff friction and enabling more predictable sprint planning across product and engineering.

Pachyderm Inc. May 2021 - March 2023

Product Designer

Oakland, CA

- Shipped multiple major product features across the platform, contributing to company growth from Series B funding through successful acquisition by Hewlett Packard Enterprise.

- Built a bi-weekly user research practice from scratch, embedding usability testing into the product development cycle and reducing late-stage design rework through earlier signal collection.

IBM

January 2019 - April 2021

User Experience Designer

San Jose, CA

- Led design of watsonx Data Lineage from brief to ship - two-person UX team, three named enterprise banking partners, nine months - securing \$100K+ in new contracts and three new Fortune 500 clients; received a Red Dot Award and remains in production six years after delivery.
- Owned design of IBM Data Privacy, a new watsonx product enabling automated privacy-policy enforcement on provisioned datasets; managed a design intern and researcher from zero to shipped across a large, ambiguous scope; core product architecture persists in IBM Software Hub today.
- Generalized the Data Lineage pattern beyond the original three-team mandate to serve ETL, AI model, and additional internal teams - negotiated adoption across seven teams without formal authority; abstraction remained in production through six subsequent years of development.
- Ran co-creation workshops with enterprise clients including ING, State Street, Rabobank, GM, and Ford across three time zones to validate and pressure-test designs for two major watsonx platform products.

Asian & Pacific Islander American Health Forum

April 2017 - October 2018

Design Strategist

Oakland, California

- Provided capacity-building services to federally funded HIV clinics nationwide as part of Capacity for Health, a CDC-funded initiative; personally partnered with at least 10 organizations across the United States.
- Researched and designed HIVAZ.org, a statewide HIV care connection platform for Arizona's Department of Health and Human Services and Aunt Rita's Foundation.
- Led a statewide service-delivery evaluation for Washington State, identifying capacity gaps across funded grantees and driving a major process shift, including a new statewide resource clearinghouse.
- Developed Design Thinking trainings and a CDC-approved brand development curriculum for the national provider network; trained 30+ personnel and coached leadership on human-centered problem-solving.
- Led concept development, theory of change, and information architecture for one of the first online education platforms in the HIV healthcare field.

EDUCATION

UX Design Immersive, UX Design **General Assembly** 2016

B.S., Hospitality and Tourism Management **San Francisco State University, College of Business** 2012-2015

High School Diploma **Jesuit High School** 2005-2009

CERTIFICATIONS

Enterprise Design Thinking Practitioner
